

# Wired Controller

XK-05A

## ► Function

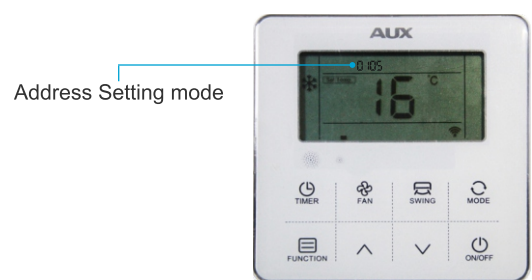

### Built-In Remote Signal Receiver

A signal receiver is built-in the remote controller. Signal from remote controller can be received by wired controller, so the system status could be adjusted using a remote controller.

### Addresses Setting

The address setting function is coupled with easy installation and simple future maintenance. Service personnel can set the address for the indoor unit using XK-05A.

## ► Follow Me

With the follow me function, the indoor unit responds to the temperature measured by the temperature sensor built-in the wired controller, rather temperature sensor in the indoor unit itself, so the temperature is measured closer to the user, rather than at the ceiling or floor height.

## ► Built-in Timer

The built-in daily timer allows the systems automatically start and stop according to user-defined time setting.

Indoor unit set to stop in 0.5 hours.

## ► User-Friendly & Elegant Design

The XK-05A is a hidden-mode controller specially designed for hotels, hospitals, schools, offices. Fitted with a background light as standard, easy to use in the dark night.

## ► Error Reporting

If there is a malfunction, error codes are displayed in the temperature setting area of the controller's display screen.

## ► Keyboard Locking

The locking function could prevent other people changing the setting state at will in public places.
